DETAILED ACTION

Priority

Acknowledge is made of applicants' claim for foreign priority base on an application 102 41 066.6 filed in Germany on 09/05/2002.

It is noted that Applicants have filled a certified copy of said application as required by U.S.C 119, which papers have been placed of record in the file.

Oath/Declaration

The oath/declaration filed on 9/4/2003 is acceptable.

Election/Restriction

Application's election **without traverse** of Group I (Claims 1-6) drawn to a semiconductor device is acknowledged for prosecution in the subject application . Applicants have the right to file a divisional, continuation or continuation-in-part application covering the subject matter of the non-elected claims.

Information Disclosure Statement

This office acknowledges of the following items from the Applicant:

Information Disclosure Statement (IDS) filed on 9/4/2003 and made of record .

The references cited on the PTOL 1449 form have been considered.

This application is in condition for allowance except for the following formal matters:

A) The drawings are objected to for the following reasons.

Figures 1- 3 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

The drawings (figures 4a- 8) are objected to under 37 CFR 1.83(a) because they fail to show “the earlier pore structure in the first section is oriented substantially perpendicularly to the main substrate plane” as described in the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Correction is required.

B) The specification is objected to for the following reasons:

(1) The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed (see MPEP § 606.01).

(2) A new abstract is required that is clearly indicative the invention to which the claims are directed.

Note that, the claims are directed to semiconductor device instead of to a method of making a semiconductor device.

(3) The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: Claims 1, 3 and 4, the terms “first earlier pore structure” and “ second pore structure” are not supported in Specification.

The specification has been checked to the extent necessary to determine the presence of all possible minor errors. However, the applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
